Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Socioeconomic Status and Demographic Characteristics of ZIP Code Tabulation Areas (2010 Census), United States, 2008-2017 Data

ZCTA10: ZCTA FIPS code, 2010

This variable has 32,989 valid cases out of 32,989 total cases.

Location: 1-5 (width: 5; decimal: 0)

Variable Type: character

ALAND10: ZCTA land area, square miles

This variable has 32,989 valid cases out of 32,989 total cases.
